A bar chart comparing the number of power-oriented (red bars) and universalist (green bars) values across different age groups. The y-axis represents the count, ranging from 0 to 50. The x-axis lists age groups from 0-5 to 95-100. The chart shows that for most age groups, the number of universalist values is significantly higher than the number of power-oriented values. The highest counts are observed in the 30-35 age group, where universalist values reach 50 and power-oriented values reach 13.

A bar chart comparing the number of power-oriented (red bars) and universalist (green bars) values across various age groups. The y-axis represents the count, ranging from 0 to 50. The x-axis lists age groups from 0-5 to 95-100. The chart shows that universalist values are significantly higher than power-oriented values in the 20-30 age group, while power-oriented values are higher in the 15-20 age group. Both types of values are very low in other age groups.

A bar chart comparing the number of power-oriented (red bars) and universalist (green bars) values across various age groups. The x-axis lists age groups from 0-5 to 95-100. The y-axis shows the count of values from 0 to 50. Power-oriented values are concentrated in the 0-5, 10-15, 20-25, and 25-30 age groups. Universalist values are most prominent in the 25-30 age group, reaching a count of 50, and are also present in the 30-35 age group.

90-95	0	0
95-100	0	0

A bar chart comparing the frequency of power-oriented and universalist values across different ranges. The x-axis shows value ranges from 0-5 to 95-100. The y-axis shows the count of respondents from 0 to 50. Red bars represent power-oriented values, and green bars represent universalist values. Universalist values are concentrated in the 25-30 range, while power-oriented values are more spread out between 15-20 and 25-30.
