

A bar chart comparing the number of power-oriented (red bars) and universalist (green bars) values across different age groups. The y-axis represents the count, ranging from 0 to 50. The x-axis lists age groups from 0-5 to 95-100. The chart shows that for most age groups, the number of universalist values is zero, while the number of power-oriented values is also zero, except for the 55-65 age group where there is a small number of power-oriented values (approximately 1) and a large number of universalist values (approximately 50).

A bar chart comparing the number of power-oriented (red bars) and universalist (green bars) respondents across various age groups. The y-axis represents the count of respondents, ranging from 0 to 50. The x-axis lists age groups from 0-4 to 95-100. The chart shows that the majority of respondents in both groups are in the 60-65 age range, with universalists being significantly more numerous than power-orienteds in this category.
